

Thesis & Dissertation Submission Flowchart

The thesis and dissertation submission process is an essential academic milestone for graduate and doctoral students. It involves drafting, faculty review, committee approval, and final submission for acceptance. This flowchart details each phase of the submission process.

Step-by-Step Process:

- Prepare Thesis Draft

The student develops a comprehensive thesis or dissertation manuscript.

- Advisor Review

The faculty advisor reviews the thesis and provides feedback.

- Revise Thesis

The student revises the document based on faculty recommendations.

- Submit to Review Committee

The revised thesis is submitted to the institution's review committee for formal evaluation.

- Defend Thesis

The student presents and defends their research before the committee.

- Final Approval?

If the committee is satisfied, the thesis moves to final submission; otherwise, further revisions are required.

- Submit Final Copy

The approved thesis is formally submitted to the university library or digital repository.

- Thesis Accepted

The student's research is officially recognized as completed.
